

Welcome to the 2nd edition of Forevision e-News Letter, released on the occasion of their 18th Anniversary (14 Aug 2014). In this e-newsletter we bring-out latest Products and features of them released by our Principals - Hitachi High Technologies, Park Systems Corporation, Thermo Fisher Scientific and SPI Supplies. We highlighted the latest road shows carried out by Forevision across India, coming up road shows, seminars and work-shops, which will be useful for our respected customers and prospects to participate. For any suggestions / comments please feel free to contact us at fipl@forevision.in.

MILE STONES

- ✓ Forevision sold **6-Units** Hitachi Table-top Microscope Model **TM3030 in One year**, which is the highest number Hitachi received in South Pacific Asia.
- ✓ Forevision sold **1st unit** of Ultra-high Resolution Field Emission Scanning Electron Microscope Model **SU8010 to PU-SAIF, Chandigarh**, during first half of 2014.
- ✓ Forevision Installed **Park AFM Models NX10& XE-Bio** at **Indian Institute of Science (IISc)**, Bangalore.
- ✓ Sold **5-Units** of **Park Systems latest Economical Research Microscope Model XE7** in 6 Months.
- ✓ Sold **1st Unit** of **Hitachi SEM Model SU3500** to **VSSUT, Sambalpur**.
- ✓ During 2013 & 2014 FV recruited experienced **“Senior Sales & Service staff”** for Western and Northern Regions stationed at Mumbai and New Delhi.

Forevision Road shows in India for TM3030

- ✓ For promotion of the New Hitachi Tabletop Microscope Model TM3030, Forevision conducted several Road Shows from November 2013 to March 2014 across India at Hyderabad, Bangalore, Pune, Chandigarh, Noida and Gurgaon.
- ✓ FV also carried out live demonstrations and conducted free sample analysis at customer premises of various sectors - Pharmaceutical, Automobile and Educational Institutions.
- ✓ Further Forevision plan to display this product at “NMD 2014”, Pune during the month of November and also in “M&T 2014”, Chennai during the month of December.

Hitachi New Schottky Field Emission Scanning Electron Microscope Model SU5000

Hitachi launches new Schottky field emission scanning electron microscope model SU5000 that integrates EM Wizard, a new user interface, and provides good operability independent of the user's skill together with high – quality images.

Key Features:

- Incorporates the newly developed user interface EM Wizard, which provides every type of user with good levels of high resolution, repeatability and throughput.
- Incorporates an automatic axis adjustment technology (auto-calibration) that can restore the microscope to its “best condition” state whenever necessary.
- Designed to reduce as much as possible any limits as regards the observation sample, and employs a “draw out” specimen chamber that is compatible with large specimens.
- The time required from the start of evacuation until making an observation is within 3 minutes of the maximum level for field emission scanning electron microscopes.

Schottky FE-SEM SU5000

The Premiere choice for Failure Analysis and large Sample Research **Park AFM Model NX20**

- NX20, the world's most accurate large sample AFM is rated so highly in the field of semiconductor and hard disk industry for its data accuracy.
- The NX20 is easy to use even for entry level engineers , cost saving with True Non-Contact mode, motorized XY Sample stage with optional encoders, step and scan automation.
- Sidewall measurements for 3D structure study.
- Surface roughness measurements for media and substrates.
- High resolution electrical scan mode.

Power and Versatility, Brilliantly Combined **Park AFM Model XE 15**

- The most convenient sample measurements with MultiSample™ Scan
- Most accurate scans with Crosstalk Elimination
- Better tip life, sample preservation and accuracy with True Non-Contact™ Mode
- The most user friendly AFM available
- Versatile range of Modes and options

We are the exclusively authorized distributors for supply of Electron Microscope consumables in India, which we promote and sell:

- Economical Sputter Coater.
- Carbon Coater for SEM applications.
- Osmium Plasma Coaters for FE-SEM applications.
- Turbo Pump Evaporation System for TEM Lab Plasma Cleaner.
- Etcher with Process Controller and Standard Critical Point Drier.
